

EnduraStore™ Roofing System

EnduraStore™ Roofing System is the best option for a low cost, high return investment for your roofing restoration project. EnduraStore™ will cost a fraction of a complete tear-off roof replacement while providing a durable surface and superior low maintenance solution for the property owner.

Superior Adhesion

Specially design to easily adhere to most roofing substrates, an EnduraStore™ Roofing System will stay flexible in extreme temperatures.

Extended Life

A thick, seamless coating restores and extends the life of your roof. EnduraStore™ provides exceptional resistance to ultraviolet light and adverse weather and wind conditions, while protecting the substrate.

Cost Effective

Instead of a complete roof replacement taking more time and money, EnduraStore™ substantially reduces your out-of-pocket costs while solving your current problems.

Environmentally Friendly

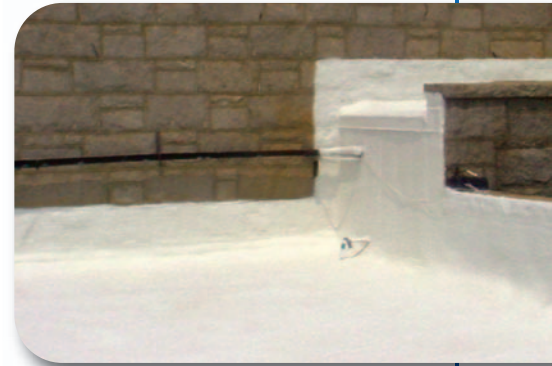

By maximizing energy and cost savings, EnduraStore™ reduces the environmental impact and meets Energy Star® guidelines.

Sustainable

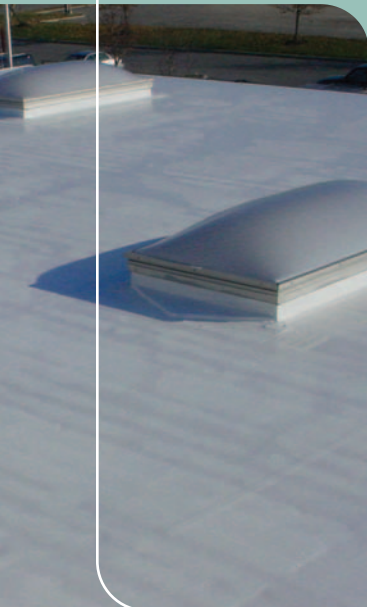

Almost maintenance free, EnduraStore™ is easy to care for and virtually trouble-free, allowing the roofing system to last a lifetime at a minimal cost.

Unmatched Adaptability

Lightweight and extremely adaptable, EnduraStore™ conforms to unique shapes and drainage systems. It does not require screws and fasteners to penetrate the roof deck, and it can be applied in sections, never requiring exposure of open roof decks.

The Unmatched EnduraStore™ Process

The EnduraStore™ System offers premium, high quality materials that have demonstrated exceptional, extended performance.

EnduraStore
Premier Roofing System

Every roofing project is different, so we customize our roofing systems to meet and exceed your specifications and expectations. With on-site specially trained, qualified Tier One Applicators, you can be assured every step in the process will be performed with excellent proficiency delivering an unmatched, premier roofing system.

EnduraStore™ provides flexible, long lasting protection even in the most adverse conditions for flat surfaces, low and high sloped roofs. This comprehensive roofing system provides a superior roof for new construction as well as existing structures, as the application process addresses each weakness in the existing roof and is ideal for any application over prefabricated metal roof panels. The EnduraStore™ process involves five distinct steps:

Prepare Surface – All surfaces are cleaned and debris is removed including loose dirt, chalking and rust. Primers may be required depending on the condition of the roof.

Seal Seams – With a seamless, water-tight application, this sealer keeps the elements from your roof while providing a flexible layer able to expand and contract with variable temperatures and weather conditions.

Seal Fasteners – Our team checks the fasteners and then they are sprayed with a plastic-free sealant with high tensile strength.

Apply Basecoat – An extremely flexible elastomeric basecoat is applied to ensure proper adhesion for the topcoat and uniform coating thickness and control.

Apply Topcoat – Finally, an elastomeric topcoat provides UV protection, durable weatherproofing and a highly reflective surface.

Once installed, the EnduraStore™ Premier Roofing System is a seamless, energy efficient, economical and weather resistant solution. EnduraStore™ is a cost effective way to extend the life of your existing roof for years to come.
